

Energy

Exploration & Production

Client
Total Petroleum

Location
Off the coast of Argentina

Detailed Onsite Design and Engineering Across All Disciplines

Project Description

- Offshore platform and plant revamping
- Detailed engineering and site support in all disciplines:
 - Processes
 - Piping
 - Mechanical
 - Civil and Structural
 - Electrical
 - Instrumentation and Control
 - Architectural Design
- Complex projects for gas and oil plants
- Design on site, under short schedule
- Gas distribution and metering pipelines
