CH2M HILL is a global leader in full-service engineering, planning, consulting, construction, programme management, and operations. Working in the United Kingdom for nearly 20 years, we have more than 290 professionals in 7 offices throughout the United Kingdom. We provide total services for site search and due diligence, governmental permitting and approvals, environmental permitting and remediation, design, and project/construction management.

Our local offices and staff are backed by a US\$5.8 billion company serving clients worldwide with more than 25,000 employees in 77 countries. We serve as a single point of contact and responsibility, managing your project through planning, financing, permitting, design, construction, and operations. We use technology transfer and leverage established relationships with local firms to deliver industrial and enterprise management solutions throughout the United Kingdom.

### Project examples in the United Kingdom

ALZA Corporation

**The London 2012 Olympic and Paralympic Games**—CH2M HILL is one of three firms comprising the international programme management consortium, CLM Delivery Partner, chosen by the Olympic Delivery Authority to oversee the design and construction of the venues and infrastructure for the 2012 Olympic and Paralympic Games.

**United Kingdom Atomic Energy Authority (UKAEA)**—CH2M HILL is a key player in successfully managing and operating the decommissioning, waste management, waste fuel strategies, and support service operations at several of the UKAEA nuclear sites including Dounreay, Windscale, Harwell, and Winfrith.

**Virgin Media**—Supplying multi-phase business consulting and system services to Virgin Media, the largest cable TV operator in the United Kingdom, to deliver the latest generation of Next Generation Network Operations Support System solutions based on Cramer Systems products. The project includes defining, implementing, and supporting network resource management, activation, auto-discovery, and flow-through provisioning processes.
